Release Notes

MacroView

System   Unique Document Numbering

Release   UDN Client 6.2 / UDN Server 6.0

Date   November 2020

What's new in this release?

- Support for Modern Authentication on SharePoint Online (Office 365). When using MacroView DMF or Message 8.5 or later with Modern Authentication enabled, UDN will utilise the DMF or Message credentials eliminating additional authentication requests.

UDN Client 6.2.14 (November 2020)

- Fixed an issue where Word would crash on an exit.

UDN Client 6.2.12 (July 2020)

- .NET Framework prerequisite updated to .NET 4.7.2
- Added other language and localisation support See more...

UDN Client 6.2.10 (April 2020)

- When the *Disable auto checkout on open* setting in MacroView DMF is checked, new documents saved using 'Save As to SharePoint' are not checked out.

UDN Client 6.2.08 (March 2020)

- Increased control over the placement of the document reference in document footers. See more…

UDN Server 6.0.2 (March 2019)

- Allows service instance to run for any role.

UDN Client 6.2.01 (November 2018)

- Support for Modern Authentication on SharePoint Online (Office 365). When using MacroView DMF or Message 8.5 or later with Modern Authentication enabled, UDN will utilise the DMF or Message credentials eliminating additional authentication requests.
- Resolves an issue with documents remaining locked after being saved as a new document in required checkout libraries (#23164).
- Resolves an issue with the footer and window caption not updating to display UDN information when opening older format XLS files from required checkout libraries on SharePoint Online (Office 365) (#22984).
- Resolves an issue with AOI/UDN not functioning when opening documents from SharePoint Online (Office 365) containing a hash symbol in its URL (#22987).
